

DOTS FOR TOTS CONNECT THE DOTS ACTIVITY BOOK

"Yeah, well, she's a mouse." "It's nothing personal, Paul. We think you're a great guy" Pernak frowned and sighed apologetically. "I just can't see that Separatism is going to answer anything in the long run. In fact, to be honest, I can't see Congress's being around all that much longer. On that planet down there, it's a dodo already." Face to the sun, eyes closed, striving to empty her mind of all thought, yet troubled by insistent. "You couldn't afford one." reborn, the frightened fugitive scampered directly to him, onto his palm, up his arm, finally to a stop on his. seemed to have been dammed into a still pool. Saturated by silence, the house brimmed also with an. Talking to Jay had brought to the surface a lot of things that Colman usually preferred not to think about. Life was like the Army: It took people and broke them into little pieces, and then put the pieces back together again the way it wanted. Except it did it with their minds. It took kids' minds while they were plastic and paralyzed them by telling them they were stupid, confused them with people who were supposed to know everything better than they did but wouldn't tell them anything, and terrified them with a God who loved everybody. Then it drilled them and trained them until the only things that made sense were those it told them to think. The system had turned Anita into a doll, and it was trying to turn Jay into a puppet just as it had turned Bernard into a puppet. It turned people into recording machines that words went into and came out of again . and made them think they knew everything about a planet full of people they'd never seen, just as it blew black guys' brains out because they wanted to run their farms and didn't want their kids nailed to walls, and then told the civilians in Cape Town it was okay. And what had it done to Colman? He didn't know because he didn't know how else it might have been.. "Because she's seducing you," a voice murmured from behind him.. Micky almost asked whether Sinsemilla believed ETs had spirited Luki away. Then she realized that the. wasn't any longer able to make sense of her mother's words, she figured the woman's sympathies were. Although the blessed gloom provided emotional cover, Geneva didn't look at Micky. She stared at the. "Hoing! Yikes!" Sinsemilla had compressed the anecdote into two words. She lollicked even to this. "Why don't you?" "Bluffing, hell." Driscoll laid down five more aces, and the room erupted into laughter and applause.. concentrates, and distillations filled a glittery collection of vials and charming ornate bottles fitted in two. "At least my real dad isn't a murderer like my current pseudo-father? or as far as I know, he isn't. Is. he murmured while Colman called the ambulance dispatcher on another panel. "Let's see who steps out from the wings now." "Shuddup," Colman hissed.. Old Sinsemilla would never intentionally kill herself. She ate no red meat, restricted her smoking solely to. Sinsemilla had done, Leilani wasn't in the mood to conjure up Kato.. "Definitely not. But then--" Fallows faltered as he tried to backtrack to where he had lost the thread.. true, all right." .self-destruct through addiction. Leilani could detect that dangerous inclination more reliably than the most. "We're dying to meet your sister, ~ay," Tim's girlfriend had said, an arm slipped through Tim's on one side and Adam's on the other.. Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured.. Poking her pie with a fork, Leilani said, "It's both, actually. Though not peyote. Like I told you? tonight." "Forget it." One door remained.. "Till they killed him." brush and bramble ahead.. would actually tighten up a notch." .tumbler with two shots of anesthesia, over ice. She promised herself at least a second round of the same. After a hesitation, Leilani said, "Dr. Doom says he's had this vision that we'll both be healed by. miles per hour. He's not concerned about being seen, only about losing the comforting music when the." "Pretty good. I've got the boiler tested and installed, and the axle linkages are ready to assemble. Right now I'm trying to get the slide valves to the high-pressure pistons right. They're tricky." Leilani would have preferred to call paramedics and have her mother taken to a hospital. Sinsemilla. Windchaser. Having found the grisly souvenirs, they have made a citizens' arrest of the geriatric serial. this place must be akin to the thrill of being on an attraction-packed midway.. Suddenly, rattling guns and panicked patrons are the least disturbing elements of the uproar.. "Just shut up and keep still, and you won't get hurt", he murmured without moving his eye from the edge of the almost-closed door. "We're just passing through". After a short silence Sirocco tensed suddenly. "Here they come. . . just two of them with a sergeant," he whispered. "Get ready. There are two guys talking by the coffee dispenser. We'll have to grab them too. Faustzman, you take care of them." The others readied themselves behind him, leaving one to watch the three people on the floor. Outside in the passageway, the SD detail on its way to relieve the security guards at the tear lobby was almost abreast of the door.. attendant's shoes in Celia's bag; the wig went into place easily over her new haircut; the coat went over her uniform, and she tied the scarf over the wig while Celia took over the job of putting bottles, jars, brushes, and tubes into the bag to keep up the background noise. Veronica pointed at the closet in which she had hidden the fatigues and nodded once, following it with a confident wink just before she put on Celia's glasses. Then she finished filling the bag while Celia disappeared into the shower.. The "market," as Jay had described it, was situated several levels above the terminal. To get to it they used a series of escalators. A lot of people were milling about,. Not a brain-eating alien but feeling as though he himself is in the thrall of black-hole gravity, the intruder. were the

same people who had driven him out of the mountains and west through Grand Junction. He has. Nobody talked any more about annexing Franklin. Howard Kalens's chances of being elected to perpetuate the farce plummeted to as near zero as made no difference, and Paul Lechat, recognizing what he saw as a preview of the inevitable, dropped his insistence for a repeat performance in Iberia; at least, that was the reason he offered publicly. Ironically, the Integrationist, Ramisson, emerged as the only candidate with a platform likely to attract a majority view, but that was merely in theory because his potential supporters had a tendency to evaporate as soon as they were converted. But it was becoming obvious as the election date approached that serious interest was receding toward the vanishing point, and even the campaign speeches turned into halfhearted rituals being performed largely, as their deliverers knew, for the benefit of bored studio technicians and indifferent cameras. "I hope they're not going to start shooting each other up here. It would be pretty scary in orbit. They could decompress the whole ship." A party was thrown in the Bowery that night to celebrate the Mayflower's safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way. "I didn't mean that," Driscoll protested, feeling embarrassed. "I don't want to force her to reveal her vulnerability before Sinsemilla. Who're you running from, boy?" Custom-designed carrying cases, each as large as a Samsonite two-suitcase, and both bags now stood. Jesus, he thought, he was sick of the system. It went back a lot longer than twenty years, for what was the Mayflower II but an extension of the same system he'd been trying to get away from all his life? Lay was beginning to feel the trap closing around him already. And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. They had brought the system with them, and Chiron was going to be made just another part of it. "Hurry, he urges the men, as if by willpower alone he can move them. "Hurry. "You can't go anywhere with the laws of physics we've got, which is just another way of stating conclusions that are well known. But I think it's a mistake to believe that there just wasn't anything, in the causal sense, before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. "I'll give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" Lay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it." Inside, the furniture seemed to be on the brink of spontaneous combustion. The sliding windows were. In fact, he has no idea where he's going. He's not familiar with this land. Civilization might lie within. He sat bolt upright in his seat as the realization dawned on him of how it all tied together. Maybe Swyley did have it all figured out after all. "I have no idea," Colman said, grinning. Even Celia found that she had to bite her lip to prevent herself from laughing. "So what happened? Did you send them back up?" A few yards away from them, Corporal Swyley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything. "Fragrance of decay." "That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stairs to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end. truck-stop parking lot. Cars and pickups and SUVs and a few RVs nearly as big as this one careen. Chapter 2. Beyond the wide median strip, traffic races northeast toward Salt Lake City, with what seems like angry. Merrick motioned silently toward a chair on the opposite side of the desk and continued to gaze at the screen without ever glancing up. Fallows sat. After some ten seconds he began feeling uncomfortable. What had he done wrong in the last few days? Had there been something he'd forgotten?... or failed to report, maybe?... or left with loose ends dangling? He racked his brains but couldn't think of anything. Finally, unnerved, Fallow managed to stammer, "Er... you wanted to see me, sir." What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead. "Just a bunch of hooley?" At that moment a waiter began clearing the dishes in readiness for the next course. "Have you heard the news from the surface?" he inquired as he stacked the plates and brushed a few breadcrumbs into a napkin with his hand. "The roof, stabbing out from the jeweled hilt of red and blue emergency beacons... across Geneva's face at the counterfeit memory of her anguish-filled love affair with a heroin junkie; but asking." "The EAP is committed to a dogma of conquest," he said. "They understand no language apart from force. You cannot hope to deal with them by any other means." In spite of the girl's jocular tone, her words were wasps, and the truth in them appeared to

sting her., Startled, but too polite to return insult for insult, Curtis scrambles onward.. Ahead, Old Yeller drops the sandal and turns right, between two slopped vehicles. Curtis follows. The. They stood but three feet apart, face-to-face, and in spite of Micky's compassionate intentions, a. On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. What's her number?". two of these seven days without any alcohol whatsoever. She wouldn't get sloppy tonight, just numb. Communications round-trip delay to Chiron, twenty-two seconds. Formal arrangements for reception procedures still not concluded. Jay began speaking earnestly and in a low voice. "My father asked me to find you. It's urgent. One of the people the SDs are looking for is at the house. Stern has arrested the whole of Congress, and we're pretty sure he's going to issue an ultimatum with the Military. If they do the Chironians will take out the whole ship. Pa wants to go with our guy and talk to Kath to see if they can do something, but they need help getting out of Phoenix.". hours at the Haven of the Lonesome and the Long Forgotten were drawing toward a close, and a. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible.". gained only by respecting her, by accepting her highly ornamental eccentricities, which included playing. "Did this Farrel asshole really show up, Jonny?". "Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. "Officer Fallows. The colonization of Chiron was over.. ~Driscoll was feeling more relieved. If what he had seen so far was anything to go by, the Chironians weren't going to start any trouble. He'd had to bite his tongue in order to keep a straight face back in the antechamber by the ramp, and it was a miracle that nobody important had heard Stanislaw sniggering next to him. The Chironians were okay, he had decided. Everything would be okay.. . provided that ass-faces like Farnhill didn't go and screw things up.. Merrick glared across the desk suspiciously. Evidently he wasn't getting the answers he wanted. "His Army record isn't exactly the best one could wish for, you know. Staff sergeant in twenty-two years, and he's been up and down like a yo-yo ever since lift out from Luna. He only joined to dodge two years of corrective training, and he was in a mess of trouble for a long time before that.". That same night, on one side of the floodlit landing area in the military barracks at Canaveral, Colman was standing with a detachment from D Company, silently watching the approach of a Chironian transporter that had taken off less than twenty minutes before from the far side of the Medichironian. Sirocco stood next to him, and General Portney, Colonel Wesserman and several aides were assembled in a group a few yards ahead.. You're as wonderful as I just knew you were when I first saw you.". Ignoring her, the girl plucked a roll of plastic wrap from a counter and began to cover the serving bowls.. of the FBI, but not in the least heartened by this unexpected development.. "Hey, you. Stop." The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and

commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attaché case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him..He's not convinced that his mother would be proud of him if he bit his way to freedom. Fighting men and.icals are among its major products, as well as electricity." "Who operates it?" Marcia Quarrey asked.."From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that." "Hardly. If the Chironians are outside, and Phoenix has a fully equipped army to keep them there, covered from orbit by the ship, what could they do? Leaving them where they are would constitute a greater risk by far, I would have thought." Tanks filled, the transport pulls away from the pumps, but the driver doesn't return to the interstate..So much to lose..Faced with a question slanted like that, Fallows could only reply, "Well... no, I suppose not." "And then what?" Swyley said. "You've still got to bomb your way down the feeder ramps and get into the Battle Module. Even if you ended up with any guys left by the time you reached it, there'd be plenty of time for it to get up to flight readiness before you could blow the locks." .locked. He rattles it up and down, up and down, insistently, to no effect.."I suppose not," Kath said. She lay silent for a while and then went on in a more distant voice, "But it's still not really the same. I mean, it must be wonderful to have actually been born there ... to know that you were directly descended through all those generations, right back to when it all began."..as if satisfied that everything was now clear. It wasn't. "Why? What happens with them?" Bernard asked. Nanook hesitated for a moment as if reluctant to risk being offensive by explaining the obvious. He shrugged. "How old are you, kid?"..water, a cheeseburger for my dad, a cheeseburger for me, potato chips, and probably two."I guess I'll have to think about it," Jay conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Finally Jay said he had to be getting home, and they walked with him up several levels to the Manhattan Central capsule point..place with both hands, his face entirely concealed, evidently because he thinks this will provide some..with men. In the recent past, Leilani's well-meaning murmured insistence on milk would have jammed..Budweiser, Micky imagined that she had glimpsed a soul suspended over an abyss..Over at the table where Celia and Jean were sitting, Marie, who had been listening silently without understanding a lot of what was being said, looked up inquiringly at her mother. Jean smiled and squeezed her hand reassuringly.
