and commoner, becoming a Mage in the Court of the Lords Regent in the Great Port of Havnor? Golden.His mother tried to explain. "It's as if you'd found some great jewel," she said, "and what's one."The Patterner sent for us," said the Master Herbal. He looked uncomfortable. Noticing a clump of weeds under the window, he said, "That's velvet. Somebody from Havnor planted it here. Didn't know there was any on the island." He examined it attentively, and put some seedpods into his pouch..She was in his charge, in his care, he had known that when he saw her. Though she came to destroy.door lintel to protect a house from fire, are in common use, familiar to unlearned people..hands. Again his glance flicked to Irian and away..ores and metals-these great things had always been in the charge of women. A rich lore of spells.By that time there were many people of the Hand who knew what was afoot on Roke. Young people came there sent by them. Men and women came to be taught and to teach. Many of these had a hard time getting there, for the spells that hid the island were stronger than ever, making it seem only a cloud, or a reef among the breakers; and the Roke wind blew, which kept any ship from Thwil Bay unless there was a sorcerer aboard who knew how to turn that wind. Still they came, and as the years went on a larger house was needed for the school than any in Thwil Town..wrathily. She stood straight and said nothing..and soul: the fire, a greater fire than that, the flight, the flight burning -.She sat down..Ember parted from him with only a "Good night." And the voice not bad, if you'd worked on it.".She was getting used to his strange face now and was able to read it. She thought that he looked.Medra bowed his head, standing there. "Anieb," he said, "can you come back this far? I don't know the way." He waited a while. He saw darkness, heard silence. Slow and halting, he entered the passage..else, to do that, I too must know your name." He paused again. As he talked it seemed to him that.cafes, the sharp, persistent smell of fried food, rows of gas flames behind windows, the clinking."Practice," Rose said, rather sourly. "I know." He was always a little reluctant to enter the witch's house, a pungent, disorderly place thick with the mysteries of women and witchcraft, very different from his own clean comfortable home, even more different from the cold austerity of the wizard's house. He shivered like a horse as he stood there, too tall for the herb-festooned rafters. He was very highly strung, and worn out, having walked forty miles in sixteen hours without food.."Some flurries," he said. She got a good look at him now in the light of lamp and fire. He was not a young man, thin, not as tall as she had thought. It was a fine face, but there was something wrong, something amiss. He looks ruined, she thought, a ruined man..not bend.."You're singing," she said and lightly tugged at me. We walked among the tables and I.interrupt their tete-a-tete. I must have committed some impropriety. He looked me up and down..They set off along the wharves, asking for a ship bound south that might take a wizard and his prentice to the Isle of the Wise, and soon enough they found a heavy trader bound for Wathort, whose master would carry the wizard for goodwill and the prentice for half-price. Even half-price was half the cheese money, but they would have the luxury of a cabin, for Sea Otter was a decked, two-masted ship.."You're welcome," she said, and hoisted whatever it was into a massive pottery bowl, and wiped her."Your father told me. A witch's daughter, a childhood playmate. He believed that you had taught her spells.".And so I was reading old books, to learn when they ceased to come east of Pendor. And in one I."You still are," Medra said. "Anieb was one of you. Since such knowledge can be betrayed or misused, it is immensely dangerous. Ordinary people-and dragons-keep their true name secret; wizards hide and defend theirs with spells. Morred could not even begin to fight his Enemy until he saw his Enemy's name written in the dust by the falling rain. Ged could force the dragon Yevaud to obey him, having by both wizardry and scholarship discovered Yevaud's true name under centuries of false ones.."Look," she said, halting. "Medra, look.".control. The other three called him Master of Old Iria. He spent his youth and what remained of his inheritance in law courts and the anterooms of the Lords of Way in Shelieth, trying to prove his right to the whole domain as it had been a hundred years ago. He came back unsuccessful and embittered and spent his age drinking the hard red wine from his last vineyard and walking his boundaries with a troop of ill-treated, underfed dogs to keep interlopers off his land.."A group of young men," said the Herbal, breathless, as he came to them. "Thorion's army. Coming here. To take the girl. To send her away." He stood and drew breath. "The Doorkeeper was speaking with them when I left. I think -".of rock and earth. The fox had been visiting the orchard lately. But the birds would have to forage if he stayed away. They must take their chances, like everyone else. He opened their gate a little. Though the rain was no more than a misty drizzle now, they stayed hunched up under the henhouse eaves, disconsolate. The best evidence in the poem for the common origin of dragons and humans is the archaic Hardic word in it that is commonly understood as "people" or "human beings," alath. This word is by etymology (from the True Runes Atl and Htha) "word-beings," "those who say words," and therefore could mean, or include, dragons. Sometimes the word used is alherath, "true-word-beings," "those who say true words," speakers of the True Speech. This could mean human wizards, or dragons, or both. In the arcane Lore of Paln, it is said, that word is used to mean both wizard and dragon..What he learned working with his father and uncle in the shipyard he could use, at least; and he.They walked a half-mile or so. The Knoll rose up full in the western sun on their right. Behind them the School sprawled grey and many-roofed on its lower hill. The grove of trees towered before them now. She saw oak and willow, chestnut and ash, and tall evergreens. From the dense, sun-shot darkness of the trees a stream ran out, green-banked, with many brown trodden places where cattle and sheep went down to drink or to cross over. They had come through the stile from a pasture where fifty or sixty sheep grazed the short, bright turf, and now stood near the stream. That house," said the mage, pointing to a low, moss-ridden roof half-hidden by the afternoon shadows of the trees. "Stay tonight. You will?".He stood there a long time before he went down through the high grasses and the sparkweed. At the foot of the hill he came into a lane. It led him through farmlands that looked well kept, though very lonesome. He looked for a lane or path leading to the town, but there never was one that went eastward. Not a soul was in the fields, some of which were

newly ploughed. No dog barked as he went by. Only at a crossroads an old donkey grazing a stony pasture came over to the wooden fence and leaned its head out, craving company. Medra stopped to stroke the grey-brown, bony face. A city man and a saltwater man, he knew little of farms and their animals, but he thought the donkey looked at him kindly..the hill. "Maybe Segoy who made them could unmake them. Maybe the earth will destroy herself..He stopped and felt the dirt under his feet. He was barefoot, as usual. When he was a student on Roke, he had worn shoes. But he had come back home to Gont, to Re Albi, with his wizard's staff, and kicked his shoes off. He stood still and felt the dust and rock of the cliff-top path under his feet, and the cliffs under that, and the roots of the island in the dark under that. In the dark under the waters all islands touched and were one. So his teacher Ard had said, and so his teachers on Roke had said. But this was his island, his rock, dust, dirt. His wizardry grew out of it. "My mastery is here," the boy had said, but it went deeper than mastery. That, perhaps, was something Dulse could teach him: what went deeper than mastery. What he had learned here, on Gont, before he ever went to Roke.."I was born in Havnor and trained as a shipwright and a sorcerer. He did not try a love-charm on her again..none so extreme as to be wholly unintelligible to the others..Ayeth's stare grew more insolent as he watched Irioth stammer. He began to say something to San, but Irioth spoke..again reached out her hand, to place her palm flat against a metal plate on a door, and entered."Even if I argued for you. They won't listen. The Rule of Roke forbids women to be taught any high art, any word of the Language of the Making. It's always been so. They will not listen. So they must be shown! And we'll show them, you and I. We'll teach them. You must have courage, Dragonfly. You must not weaken, and not think, "Oh, if I just beg them to let me in, they can't refuse me." They can, and will. And if you reveal yourself, they will punish you. And me." He put a ponderous emphasis on the last word, and inwardly murmured, "Avert.".are to help me, and if I am to teach you, you must try a little harder. I think you know how." He.to speak a Summoning instead, and the spell had begun to work before he realised what he was doing."Ride back," he said. "Leave me here. There's enough food for one man for three or four days more..He came back in the evening, lamer than ever, for of course San had walked him clear out into the Long Fields where most of his beeves were. Nobody had horses but Alder, and they were for his cowboys. She gave her guest a basin of hot water and a clean towel for his poor feet, and then thought to ask him if he might want a bath, which he did. They heated the water and filled the old tub, and she went into her room while he had his bath on the hearth. When she came out it was all cleared away and wiped up, the towels hung before the fire. She'd never known a man to look after things like that, and who would have expected it of a rich man? Wouldn't he have servants, where he came from? But he was no more trouble than the cat. He washed his own clothes, even his bedsheet, had it done and hung out one sunny day before she knew what he was doing. "You needn't do that, sir, I'll do your things with mine," she said..She got up slowly. She stood behind the armchair..The poem begins with the best known and most cherished love story in the Archipelago, that of.English translation Copyright ? 1980 by Stanislaw Lem.The so-called Six Hundred Runes of Hardic are not the Hardic runes used to write the ordinary language. They are True Runes that have been given "safe," inactive names in the ordinary language. Their true names in the Old Speech must be memorised in silence.
